### DIRECTOR

Heather Campbell

Dear Parents and Guardians,

Progress towards the completion of the Phase 1 renovation for Donald Young School has been going well. There have been many improvements made to our building since the last update that was provided to you on September 6<sup>th</sup>.

Most of the focus the past week has been on completing the connecting link between the new section and old section of the school. Last week, work was a little slower than anticipated due to more structural engineering work needed for the roof supports. This week, work is being done on the foundation insulation, window installation, roof trusses are being installed and roof sheathing should be completed. Next week, we expect to see parapets constructed and the roofing installed. Once that is completed, a focus will be on completing interior finishes such as paint and drywall installation. An engineering review will occur following the completion of these items so that we may gain occupancy in the link soon.

Work completed since the last update include:

- All remaining windows have been installed with the exception of the display cabinet.
- Mirrors have been installed in the boys and girls washroom.
- Library shelving has been installed and set up. Library classes have started.
- Gym has been cleared out and is available for student use.
- Accessible door entries are being installed at the entrances with an automatic school locking system.
- Courser gravel was spread behind the school and compacted to try and reduce the amount of sand entering the school.

Thank-you for your continued support and understanding during the construction process. If you have any concerns, please contact me at the school at 482-2271.

Sincerely,

Kelly Forbes  
Principal, Donald Young School
